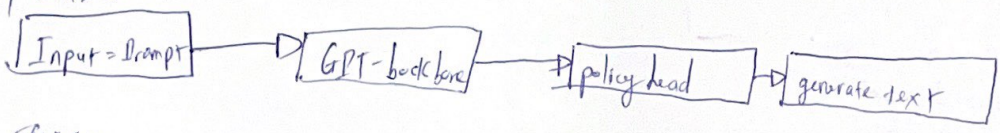
Use LLM to choose which is better : GPT-2 / GPT-2 + PPO.

Use LLM to rate score Prompt+Answer : RoBerta

policy network : GPT2 - backbone + policy head

value network : GPT2 - backbone + value head

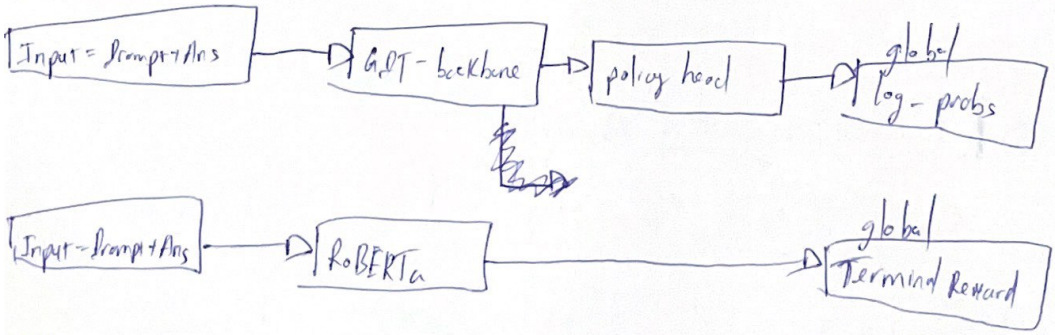
+ Roll_Out :



{ Prompt
Answer.
~~Trajectory Reward~~

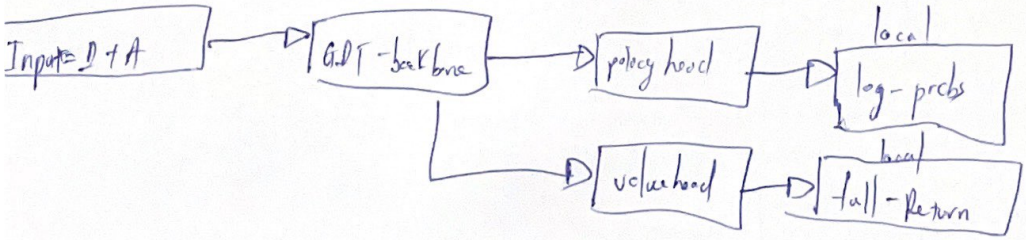
Trajectory:

+ Forward:



{ log - prob (global)
Terminal Reward

+ Training :



{ log_probs (local)
full - return
Each token reward = $\beta \cdot - \log\left(\frac{\pi_{policy\theta}}{\pi_{global\theta}}\right)$

KL - Divergence.
